1.1 Distribution List

Name / Role	Organization	Purpose
Director, IT Services	Perfect Solutions	Approver
Head of Human Resources	Perfect Solutions	Approver
Chief Financial Officer	Perfect Solutions	Reviewer
Engineering Manager	Perfect Solutions	Reviewer
Implementation Lead	AurborBloom	Owner
Product Manager	AurborBloom	Author

2. Executive Summary

Perfect Solutions is a mid-sized IT Services and Software Development firm headquartered in the United States, operating with a workforce of approximately 51–250 employees distributed across engineering, sales, marketing, finance, human resources, and general operations. As the company scales its delivery footprint and onboards increasingly distributed talent, it has identified the need to consolidate its people-operations stack onto a single, multi-tenant SaaS platform — AurborBloom HRMS.

This Business Requirements Document (BRD) captures the consolidated set of business goals, stakeholder expectations, success metrics, scope boundaries, and business-level requirements that must be satisfied by the AurborBloom HRMS deployment for Perfect Solutions. It serves as the contractual foundation upon which the Functional Requirements Document (FRD), system design, and acceptance test cases will be built.

Key Outcome Targets — reduce HR administrative effort by 60%, eliminate spreadsheet-driven tracking, achieve 99.9% platform availability, and deliver a measurable improvement in employee experience within two quarters of go-live.

2.1 Business Drivers

- Rapid headcount growth has outstripped existing spreadsheet- and email-based HR processes.
- Multiple disconnected tools cause data drift and reconciliation overhead.
- Compliance and audit readiness demand a centralized, immutable record of HR transactions.
- Distributed teams require a single, branded portal accessible from any device.
- Leadership requires real-time, role-based dashboards for workforce decisions.

3. Company Overview — Perfect Solutions

Attribute	Value
Legal Name	Perfect Solutions
Industry	IT Services & Software Development
Company Size	Medium (51 – 250 employees)
Primary Markets	United States, with offshore engineering presence
Brand Tagline	Unleashing IT Talent
Primary Brand Color	#1E3A8A (Deep Corporate Blue)
Secondary Brand Color	#3B82F6 (Action Blue)
Public Website	www.perfectgroupus.com
HRMS Tenant Slug	perfectsolutions
Custom Domain	hr.perfectsolutions.com
Departments In Scope	Engineering, Sales, Marketing, Finance, HR, General

3.1 Strategic Context

Perfect Solutions positions itself as a high-velocity IT talent firm. The HR function is therefore not a back-office cost center but a competitive differentiator: speed of hiring, accuracy of billing for time-and-materials engagements, and employee retention all flow directly through HR systems. The HRMS is treated as a Tier-1 business system with stringent uptime, security, and reporting requirements.

4. Stakeholders & User Personas

The following stakeholder map identifies the primary actors who will interact with, sponsor, govern, or be impacted by the AurborBloom HRMS deployment for Perfect Solutions.

Stakeholder	Role	Influence	Interest	Engagement
Director, IT Services	Executive Sponsor	High	High	Steering committee, monthly review
Head of Human Resources	Business Owner	High	High	Weekly working group
CFO	Financial Approver	High	Medium	Budget gates, ROI checkpoints
Engineering Manager	Power User	Medium	High	Pilot user, feedback loop
HR Operations Lead	Day-to-day Owner	Medium	High	UAT, training champion
IT Security Officer	Risk Approver	High	Medium	Security review at each phase
Employees (all)	End Users	Low	High	Onboarding sessions, in-app guides
Managers (all departments)	Approvers	Medium	High	Train-the-trainer model
External Auditor	Compliance Reviewer	Medium	Low	Read-only access at audit time

4.1 Detailed User Personas

Priya — HR Operations Lead

Role: Manages onboarding, leave approvals, policy enforcement, audit responses.

Pain Points: Manual data entry, chasing managers for approvals, reconciling spreadsheets, generating monthly reports.

Desired Outcome: A single dashboard with pending approvals, automated reminders, and one-click report exports.

Daniel — Engineering Manager

Role: Approves time, leave, and ticket escalations for an engineering team of ~25.

Pain Points: Switching between tools, no real-time visibility into team capacity, approvals buried in email.

Desired Outcome: Mobile-friendly approval queue, team capacity heatmap, project allocation visibility.

Anita — Software Engineer

Role: Logs hours, requests leave, raises IT helpdesk tickets, downloads payslips.

Pain Points: Forgetting to log time, unclear leave balance, no visibility into ticket status.

Desired Outcome: Friction-free time entry, instant leave balance, ticket status notifications.

Marcus — CFO

Role: Approves payroll, monitors workforce cost, reviews compliance posture.

Pain Points: Late or inconsistent reports, lack of trend visibility, manual reconciliation with payroll vendor.

Desired Outcome: Executive dashboard with cost-per-department, trend charts, exportable payroll registers.

Sophia — IT Security Officer

Role: Owns access governance, data classification, audit response.

Pain Points: No central audit log, ambiguous role definitions, password sprawl.

Desired Outcome: Immutable audit trail, granular RBAC, SSO/2FA, encryption at rest and in transit.

5. Business Goals & Success Metrics

The following SMART business objectives have been agreed by the Perfect Solutions steering committee. Each objective is paired with a measurable Key Performance Indicator (KPI) and a target value to be achieved within two quarters of go-live (T+6 months).

#	Business Goal	KPI	Baseline	Target (T+6m)
BG-01	Centralize all HR data into a single platform	% of HR processes on AurborBloom	0%	≥ 95%
BG-02	Automate attendance / timesheet capture	Manual time-entry corrections / month	~120	< 15
BG-03	Reduce leave processing cycle time	Avg. days from request to decision	3.2 days	< 1 day
BG-04	Improve internal support responsiveness	Avg. ticket first-response time	8 hours	< 2 hours
BG-05	Increase employee self-service adoption	% self-service actions	30%	≥ 90%
BG-06	Ensure audit-ready records	Audit findings	—	Zero material findings
BG-07	Strengthen brand experience	Employee NPS for HR tools	+12	≥ +45
BG-08	Reduce HR operational cost	HR admin hrs / 100 emp / mo	180	≤ 70
BG-09	Achieve enterprise-grade availability	Uptime (rolling 30 days)	—	≥ 99.9%
BG-10	Enable data-driven workforce planning	Manager dashboard MAU	—	≥ 80%

6. Scope of the Engagement

6.1 In Scope

- Multi-tenant deployment of AurborBloom HRMS for the perfectsolutions tenant.
- White-label branding: logo, primary/secondary colors, custom domain, email sender, browser tab title.
- Modules: Auth & RBAC, Employee Directory, Time & Attendance, Leave, Tickets, Calendar, Projects, Documents, Performance, Reports, Chat.
- Departments: General, Engineering, HR, Sales, Marketing, Finance.
- Leave types: Vacation, Sick, Personal, Unpaid.
- Roles: Super Admin, Tenant Admin, HR Manager, People Manager, Employee.
- Secure invite-only signup tied to tenant-specific admin invite codes.
- Data migration from spreadsheets for active employees and current balances.
- Training (admins, managers, employees) and operations runbook.
- 30-day hypercare post go-live.

6.2 Out of Scope (Phase 1)

- Full payroll calculation and statutory tax filing (handled by external payroll provider).
- Recruitment / Applicant Tracking System (ATS) — Phase 2.
- Learning Management System (LMS) integration — Phase 2.
- Biometric hardware integration — Phase 2.
- Mobile native applications (iOS/Android) — Phase 2.
- Migration of historical (> 24 months) leave and timesheet data.

6.3 Assumptions

1. Perfect Solutions provides a single, empowered point of contact (SPOC).
2. Cleansed master data (employees, departments, managers) provided prior to migration.
3. DNS access for hr.perfectsolutions.com granted for CNAME verification.
4. 9×5 support is acceptable post hypercare; 24×7 a Phase 2 consideration.
5. Users on modern evergreen browsers (latest two versions).
6. English-only at go-live.

6.4 Constraints

- Go-live before the start of the next fiscal-year planning cycle.
- All production data stored in regions compliant with US data protection regulations.
- Maximum scheduled downtime: one 2-hour window per month, off-hours.
- Fixed implementation budget; scope changes via formal change-control.

7. Business Processes — Current vs Future

The table below summarizes the most impactful HR processes that will transition from manual / semi-digital to fully automated on AurborBloom HRMS.

Process	Current State (As-Is)	Future State (To-Be)	Expected Benefit
Onboarding	Email-driven, paper forms, manual asset assignment.	Digital workflow, pre-arrival document collection, auto provisioning.	Cycle: 5 days → 1 day.
Time Tracking	Spreadsheets emailed weekly.	In-app entry, approvals, project tagging, exception alerts.	Billing accuracy +15%.
Leave Requests	Email + spreadsheet ledger by HR.	Self-service, real-time balance, automated routing, calendar sync.	Cycle < 1 day; zero balance disputes.
IT Helpdesk	Shared mailbox; no SLA tracking.	Tickets with categories, SLAs, comments, attachments, CSAT.	First response < 2h.
Performance	Annual, paper-based.	Continuous feedback, quarterly check-ins, OKRs.	Higher engagement & retention insight.
Audit Response	Manual data pull from many sources.	Single export with immutable audit log.	~70% prep time reduction.

Figure 3 — Leave Request Workflow

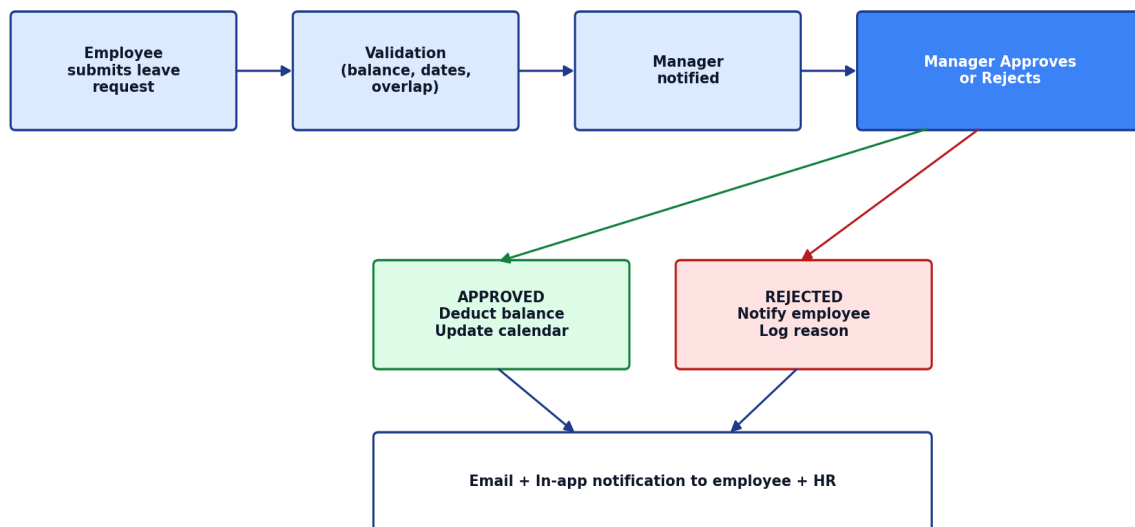

Figure 3 — Future-state Leave Request Workflow

8. Business Requirements

Each requirement is uniquely identified (BR-NNN), categorized, prioritized using MoSCoW, and traced to a business goal. Functional decomposition is in the FRD (PS-FRD-2026-001).

ID	Category	Requirement	Pri.	Goal
BR-001	Branding	Display Perfect Solutions branding consistently across pages and outbound email.	Must	BG-07
BR-002	Access	Only invited admins with valid tenant-specific invite codes may sign up.	Must	BG-06
BR-003	Access	Authentication required before any non-public route.	Must	BG-06
BR-004	Access	Enforce RBAC with at minimum five roles.	Must	BG-06
BR-005	Employees	HR can create, update, deactivate, search employees.	Must	BG-01
BR-006	Time	Employees log time daily/weekly with project tagging.	Must	BG-02
BR-007	Time	Managers approve, reject, or request changes on timesheets.	Must	BG-02
BR-008	Leave	Employees view current balance and submit leave requests.	Must	BG-03
BR-009	Leave	Managers approve / reject with notifications.	Must	BG-03
BR-010	Leave	Prevent overlapping or balance-exceeding requests.	Must	BG-03
BR-011	Tickets	Employees raise tickets categorized by department.	Must	BG-04
BR-012	Tickets	Tickets track SLA against configured targets.	Should	BG-04
BR-013	Calendar	Approved leaves and events surface in unified calendar.	Must	BG-05
BR-014	Documents	Employees access pay slips, policies, personal docs.	Must	BG-01
BR-015	Reports	Export workforce, attendance, leave reports (CSV/Excel).	Must	BG-10
BR-016	Reports	Real-time dashboards by dept / role / project.	Should	BG-10
BR-017	Notifications	Approval workflows produce in-app + email notifications.	Must	BG-03
BR-018	Audit	Every state-changing action recorded in immutable audit log ≥ 7 yrs.	Must	BG-06
BR-019	Security	Modern adaptive password hashing; PII encrypted at rest.	Must	BG-06
BR-020	Security	Rate-limited logins; lockout after 5 failures.	Must	BG-06
BR-021	Availability	Maintain ≥ 99.9% monthly uptime.	Must	BG-09
BR-022	Performance	95% of API requests under 500 ms at normal load.	Should	BG-09
BR-023	Usability	Fully responsive UI; WCAG 2.1 AA accessibility.	Should	BG-07
BR-024	Self-service	Employees complete routine HR actions without HR.	Must	BG-05
BR-025	Integrations	Expose REST APIs for payroll, SSO, BI.	Should	BG-08

ID	Category	Requirement	Pri.	Goal
BR-026	Compliance	Provide data export and deletion for data subject rights.	Must	BG-06
BR-027	Localization	Default tz America/New_York with per-employee override.	Should	BG-07
BR-028	Mobile	Employee flows usable on mobile browsers (≥ 360 px).	Must	BG-07
BR-029	Tenant Isolation	No cross-tenant data accessible from perfectsolutions.	Must	BG-06
BR-030	DR	RPO ≤ 1 hour, RTO ≤ 4 hours.	Must	BG-09

9. Risk Analysis & Mitigation

Risks scored on Likelihood (L) and Impact (I), 1–5. Score = L × I. Risks ≥ 12 tracked weekly by steering committee.

ID	Risk	L	I	Score	Mitigation	Owner
R-01	Resistance to change from long-tenured employees	3	4	12	Change-management plan, executive sponsorship, training.	HR Lead
R-02	Master-data quality issues delay migration	4	4	16	Data-cleansing sprint, phased migration with rollback.	PMO
R-03	DNS / CNAME setup delays go-live	2	3	6	Pre-validate DNS; fallback to *.aurorbloom.com.	IT
R-04	Security incident exposes PII	2	5	10	Encryption, RBAC, audit log, SOC monitoring.	InfoSec
R-05	Vendor LLM costs exceed budget	3	2	6	Universal Key with budget alerts; cap per-feature spend.	Finance
R-06	Browser compatibility regressions	3	2	6	Automated cross-browser test suite in CI.	Eng.
R-07	Insufficient mobile experience reduces adoption	3	4	12	Mobile-first review for every employee flow.	Product
R-08	Unplanned downtime during peak hours	2	5	10	Blue-green deploys, off-hours windows, SRE on-call.	DevOps
R-09	Cross-tenant data leakage	1	5	5	Tenant-scoped queries, isolation tests in CI.	Eng.
R-10	Audit failure due to incomplete logging	2	5	10	Immutable append-only audit log with verification.	Compl.

10. Regulatory & Compliance Considerations

- U.S. labor recordkeeping (FLSA): time records ≥ 3 years; payroll-ready exports.
- U.S. state-specific paid-sick-leave rules: leave types configurable per policy.
- Data privacy: explicit consent, right to access and delete, breach notification within 72 hours.
- SOC 2 Type II posture: annual third-party assessment of security, availability, confidentiality.
- Internal IT policies: SSO-readiness, password complexity, session timeout (≤ 30 min idle).

11. Glossary

Term	Definition
BRD	Business Requirements Document
FRD	Functional Requirements Document
HRMS	Human Resource Management System
MoSCoW	Prioritization framework: Must / Should / Could / Won't
RBAC	Role-Based Access Control
RPO	Recovery Point Objective
RTO	Recovery Time Objective
SLA	Service Level Agreement
SPOC	Single Point Of Contact
SaaS	Software as a Service
Tenant	Isolated logical instance within multi-tenant SaaS
UAT	User Acceptance Testing
WCAG	Web Content Accessibility Guidelines

12. Approval & Sign-off

The undersigned acknowledge that this Business Requirements Document represents the agreed-upon business needs of Perfect Solutions for the AurborBloom HRMS implementation. Material changes shall be processed via formal change control.
